

4th International Conference on
GLOBAL 15-18 JUNE 2020
FOOD SECURITY MONTPELLIER, FRANCE

Sponsorship and Exhibition Opportunities

THE CONFERENCE

The **4th International Conference on Global Food Security** addresses the topic of food security at all spatial levels from local to global, and from an interdisciplinary and systemic food systems perspective. It aims to better understand environmental, nutritional, agricultural, demographic, socio-economic, political, technological and institutional drivers, costs and outcomes of current and future food security. Interactions with contextual factors including climate change, urbanisation, greening the economy and data-driven technologies will be central. The conference addresses the triple burden of malnutrition: hunger, micronutrient deficiencies and obesity. It explores the state-of-the-art of interdisciplinary insight, addresses the trade-offs that occur – and synergies that can be sought – in transforming food systems. These are aimed at reconciling the competing environmental, economic or social objectives and outcomes towards achieving the Sustainable Development Goals at different levels across spatial and temporal scales.

We are pleased to announce that we have adopted a “code of conduct for organizers, participants and sponsors”, which acknowledges the legitimate interests of the different stakeholders of the conference, recognizing that we are all parts of a scientific endeavor to promote scientific and knowledge sharing and to produce public goods on global food security. Please see more detailed information on this [here](#)

Join us in this exciting opportunity to ensure that the best science is garnered to support the emergence of the Sustainable Development Goals.
